If you are looking for **quality**, **professionalism** and **absolute respect of agreed delivery times** in the achievement of works in valued materials like marble, granite and natural stone, **Mar-Pierre** can meet your needs and expectations.

Mar-Pierre started up operating on both a national and international scale and, since its establishment, is distinguished due to a series of continual collaborations with companies noted for being real landmarks in the stone sector.

Mar-Pierre's field of action goes from the supply of cut to size material for private use (like houses or shops of a limited size) to that of cladding and decoration of large areas (such as shopping centres and construction & restoration of building complexes).

Simultaneously, and thanks to their close network of contacts in various parts of the world, **Mar-Pierre** has a very wide range of rough materials (blocks) as well as slabs, tiles, etc. which they can propose at very competitive prices.

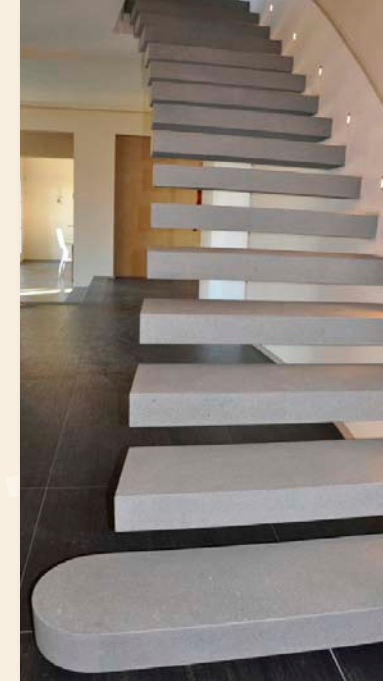

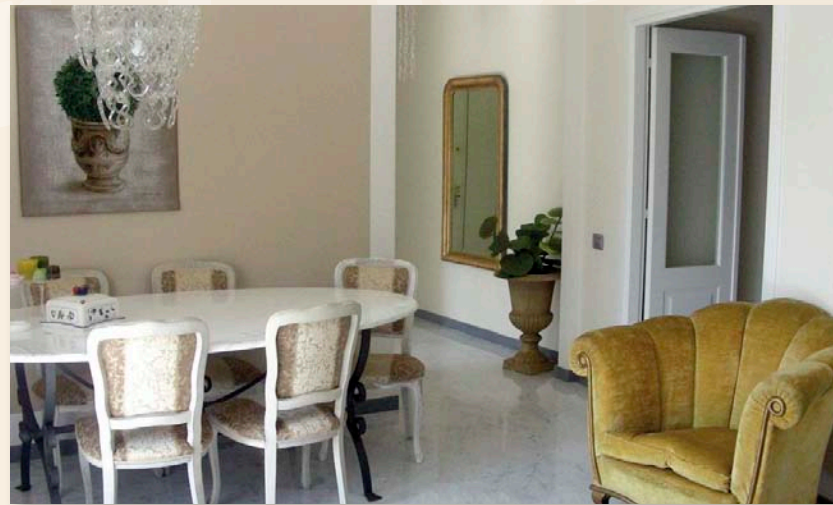

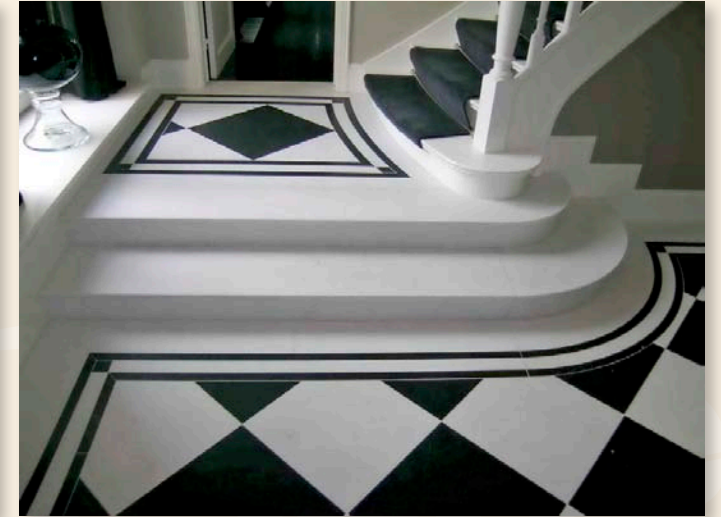

Mar-Pierre has chosen to build its future on the basis of reliability of service offered and by availing itself exclusively of the co-operation of highly qualified personnel.

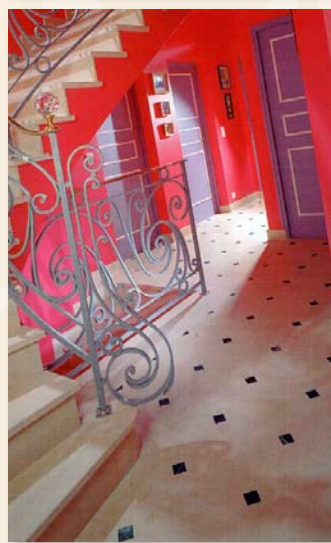

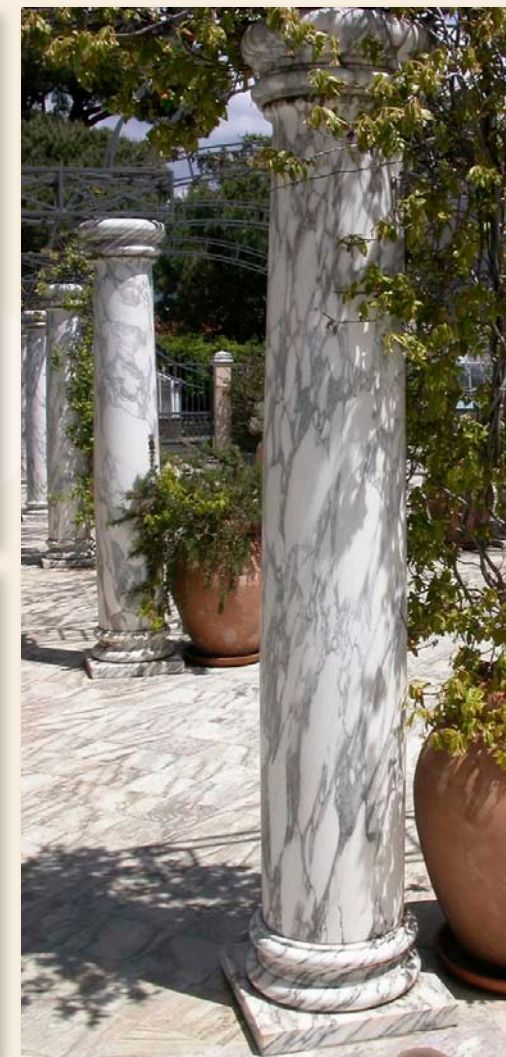

To fully guarantee the final product **Mar-Pierre's** staff carry out a series of controls at all levels. In fact the materials used are accurately inspected.

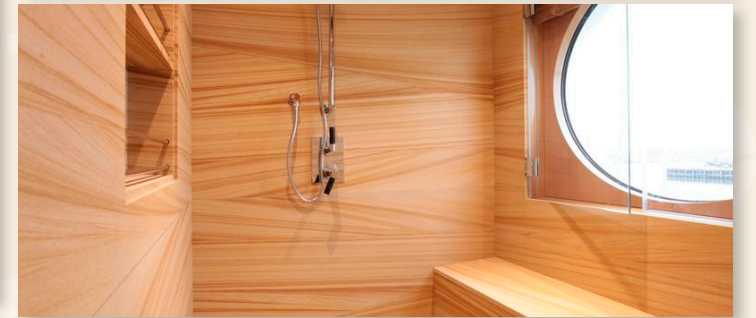

Hence all the different phases of their workmanship are periodically controlled, such as loading operations for transportation to an established destination.
